Expanded Abstract Submissions

EAGE Amsterdam, June 8-11, 2009

Controlled source electromagnetic interferometry by multidimensional deconvolution: Spatial sampling aspects in sea bed logging
Jürg Hunziker, Evert Slob* & Kees Wapenaar (Delft University of Technology) 1

Feasibility of borehole radar measurements to monitor water/steam fronts in EOR applications
Mattia Miorali* & Evert Slob (Delft University of Technology) 5

Extended common-image-point gathers for wave-equation migration
Paul Sava (Center for Wave Phenomena, Colorado School of Mines) & Ivan Vasconcelos (ION Geophysical, GXT Imaging Solutions) 9

Iterative extended Born approximation based CG-FFT integral equation method for low-frequency 3D modeling
Ali Moradi Tehrani & Evert Slob (Delft University of Technology) 13

Image-domain interferometry and wave-equation extended images
Ivan Vasconcelos (ION Geophysical, GXT Imaging Solution), Paul Sava (Center for Wave Phenomena, Colorado School of Mines) & Huub Douma Vasconcelos (ION Geophysical, GXT Imaging Solution) 17

Interval moveout inversion of wide-azimuth P-wave reflection data
Xiaoxiang Wang & Ilya Tsvankin (Center for Wave Phenomena, Colorado School of Mines) 21

P- and SV-mode separation in complex geology with VTI anisotropy
Jia Yan & Paul Sava (Center for Wave Phenomena, Colorado School of Mines) 25

SEG Houston, October 25-30, 2009

Reflection coefficients in attenuative anisotropic media
Jyoti Behura & Ilya Tsvankin (Center for Wave Phenomena, Colorado School of Mines) 29
Role of the inhomogeneity angle in anisotropic attenuation analysis  
Jyoti Behura & Ilya Tsvanki, (Center for Wave Phenomena, Colorado School of Mines)  

3-D Controlled Source Electromagnetic (CSEM) interferometry by multi-dimensional deconvolution  
Yuanzhong Fan, Roel Snieder (Center for Wave Phenomena, Colorado School of Mines) & Johannes Singer (Shell International Exploration and Production, Houston)  

Influence of background heterogeneity on traveltime shifts for compacting reservoirs  
Rodrigo Felicio Fuck (now at Schlumberger Cambridge Research, previously at Colorado School of Mines), Ilya Tsvankin (Center for Wave Phenomena, Colorado School of Mines) & Andrey Bakulin (WesternGeco)  

Image-guided blended neighbor interpolation of scattered data  
Dave Hale (Center for Wave Phenomena, Colorado School of Mines)  

Controlled source interferometry with noisy data  
Jurg Hunziker*, Joost van der Newt, Evert Slob & Kees Wapenaar (Delft University of Technology)  

Uncertainty analysis for the integration of seismic and CSEM data  
Myoung Jae Kwon & Roel Snieder (Center for Wave Phenomena, Colorado School of Mines)  

Effects of multi-scale velocity heterogeneities on wave-equation migration  
Yong Ma & Paul Sava (Center for Wave Phenomena, Colorado School of Mines)  

Resolution analysis of wide-azimuth angle decomposition for wave-equation migration  
Gabriela Melo, (Earth Resources Laboratory, Massachusetts Institute of Technology) & Paul Sava (Center for Wave Phenomena, Colorado School of Mines)  

A modeling study of a borehole radar system as a permanent down-hole sensor  
Mattia Miorali, Evert Slob (Delft University of Technology) & Rob Arts (Delft University of Technology and TNO)  

Freeform modeling of faulted surfaces in seismic images  
Derek Parks (Center for Wave Phenomena, Colorado School of Mines)  

Comparison of shot encoding functions for reverse-time migration  
Francesco Perrone & Paul Sava (Center for Wave Phenomena, Colorado School of Mines)
