<b>Introduction</b>	<b>ix</b>
<b>Modeling</b>	
Quartic moveout coefficient: 3-D analytic description and application to TI media (CWP-405) <i>A. Pech, I. Tsvankin &amp; V. Grechka</i> . . . . .	1
Analysis of image gathers in factorized VTI media (CWP-406) <i>D. Sarkar &amp; I. Tsvankin</i> . . . . .	15
The formation of caustics in two- and three-dimensional media (CWP-360P) <i>J. Spetzler &amp; R. Snieder</i> . . . . .	27
Tutorial: The Fresnel volume and seismic imaging (CWP-393P) <i>J. Spetzler &amp; R. Snieder</i> . . . . .	37
Scale factor for ray theoretic Green's function amplitudes (CWP-407) <i>N. Bleistein</i> . . . . .	47
Uniform asymptotic expansion of the square root Helmholtz operator and the one-way wave propagator (CWP-402P) <i>M.V. de Hoop &amp; A.K. Gaoresen</i> . . . . .	53
Comparison of seismic dispersion and attenuation models (CWP-408) <i>B. Ursin &amp; T. Toverud</i> . . . . .	73
Geometrical spreading in a layered transversely isotropic medium with a vertical symmetry axis (CWP-409) <i>B. Ursin &amp; K. Hokstad</i> . . . . .	97
<b>Multicomponent Seismology</b>	
Anisotropic inversion and imaging of <i>PP</i> and <i>PS</i> reflection data in the North Sea (CWP-385P) <i>V. Grechka, I. Tsvankin, A. Bakulin, J.O. Hansen &amp; C. Signer</i> . . . . .	109
Inversion of multi-component, multi-azimuth walkaway VSP data for the stiffness tensor (CWP-410) <i>P. Dewangan &amp; V. Grechka</i> . . . . .	121

Parameter estimation in orthorhombic media using multicomponent reflection data (CWP-411)	
<i>V. Grechka, A. Pech &amp; I. Tsvankin</i>	133
Joint nonlinear inversion of <i>PP</i> - and <i>PS</i> -wave reflection coefficients in anisotropic media (CWP-412)	
<i>P. Jílek</i>	143
Anisotropic inversion of seismic data for stressed media: Theory and physical modeling study on Berea sandstone (CWP-399P)	
<i>D. Sarkar, A. Bakulin &amp; R.L. Kranz</i>	175
<b>Fracture Characterization</b>	
Feasibility of seismic characterization of multiple fracture sets (CWP-413)	
<i>V. Grechka &amp; I. Tsvankin</i>	195
Two theories for fluid substitution in porous rocks with aligned cracks (CWP-414)	
<i>R. Cardona</i>	207
Integrating pressure-transient experiments and seismic reservoir characterization (CWP-415)	
<i>R. Cardona</i>	219
<b>Velocity Analysis &amp; Imaging</b>	
Selective-correlation velocity analysis (CWP-416)	
<i>V. Celis &amp; K. Lerner</i>	229
3D depth imaging with generalized screens: A salt body case study (CWP-398P)	
<i>J. Le Rousseau, H. Calandra &amp; M.V. de Hoop</i>	243
Seismic inverse scattering in the ‘wave-equation’ approach (CWP-417)	
<i>C. Stolk &amp; M.V. de Hoop</i>	257
<b>Scattering</b>	
On the phase of the apparent attenuation operator in the convolutional model of the seismic trace (CWP-401P)	
<i>A. Mateeva</i>	269
Measuring the two-point correlation function of a turbulent fluid with coda wave interferometry (CWP-418)	
<i>R. Snieder</i>	275
The breakdown of wave diffusion in 2D due to loops (CWP-419)	
<i>M. Haney &amp; R. Snieder</i>	283
<b>Inversion &amp; Error Analysis</b>	
A proposal for common-opening-angle migration/inversion (CWP-420)	
<i>N. Bleistein &amp; S.H. Gray</i>	293
The relationship between the 2D Beylkin determinant and 2D ray Jacobian: Consequences for inversion formulas (CWP-421)	
<i>N. Bleistein</i>	305
2.5D modeling and inversion/migration by the generalized Radon transform (CWP-422)	
<i>S-K. Foss &amp; B. Ursin</i>	311

Data and model uncertainty estimation for linear inversion (CWP-362P) <i>K. van Wijk, J.A. Scales, W. Navidi &amp; L. Tenorio</i> . . . . .	323
--	-----

**Experimental Studies**

Seeing heterogeneities in rocks: Preliminary results from a noncontacting ultrasonic experiment (CWP-423) <i>A. Malcolm &amp; J. Scales</i> . . . . .	333
Monitoring thermal cracking with coda wave interferometry (CWP-424) <i>A. Grêt, R. Snieder, J. Scales &amp; M. Batzle</i> . . . . .	343
