<b>Introduction</b>	<b>vii</b>
<b>Modeling</b>	
Numerical modeling of waves incident on slip discontinuities (CWP-444) <i>M. Haney &amp; R. Snieder</i> . . . . .	1
Reflected and transmitted waves from fault zones (CWP-445) <i>Y. Zhu &amp; R. Snieder</i> . . . . .	11
Radiative transfer in 1D and connection to the O’Doherty-Anstey formula (CWP-446) <i>M. Haney, K. van Wijk, &amp; R. Snieder</i> . . . . .	25
Analytic description of geometrical spreading in azimuthally anisotropic media (CWP-447) <i>X. Xu, I. Tsvankin &amp; A. Pech</i> . . . . .	37
<b>Migration &amp; Imaging</b>	
True amplitude wave equation migration arising from true amplitude one-way wave equations (CWP-448) <i>Y. Zhang, G. Zhang &amp; N. Bleistein</i> . . . . .	51
The applicability of DMO/AMO in the presence of caustics. (CWP-436P) <i>A. Malcolm, M.V. de Hoop, &amp; J.H. Le Rousseau</i> . . . . .	69
Closed-form expressions for map time-migration in VTI media and the applicability of map depth-migration in the presence of caustics (CWP-449) <i>H. Douma &amp; M.V. de Hoop</i> . . . . .	89
Explicit expressions for map time-migration in weakly anisotropic VTI media (CWP-450) <i>H. Douma</i> . . . . .	109
<b>Velocity Analysis</b>	
Migration velocity analysis in factorized VTI media (CWP-451) <i>D. Sarkar &amp; I. Tsvankin</i> . . . . .	119
Quartic moveout coefficient for dipping azimuthally anisotropic layers (CWP-452) <i>A. Pech &amp; I. Tsvankin</i> . . . . .	133

Global wave-equation reflection tomography (CWP-453) <i>M. V. de Hoop, &amp; R. van der Hilst</i> . . . . .	143
<b>Data Processing</b>	
Generation and procession of pseudo shear-wave data: Theory and case study (CWP-454) <i>V. Grechka &amp; P. Dewangan</i> . . . . .	153
Measuring, imaging and suppressing multiply scattered surface waves (CWP-455) <i>X. Campman, K. van Wijk, J. Scales &amp; G. C. Hermann</i> . . . . .	165
Fault-plane reflection as a diagnostic of pressure differences in reservoirs: A case study (CWP-456) <i>M. Haney, J. Sheiman, R. Snieder, S. Naruk &amp; J. Busch</i> . . . . .	173
<b>Vertical Seismic Profiling</b>	
Distortions in VSP spectral ratios caused by thin horizontal layering (CWP-441P) <i>A. Mateeva</i> . . . . .	179
Quantifying the uncertainties in absorption estimates from VSP spectral ratios (CWP-457) <i>A. Mateeva</i> . . . . .	189
<b>Scattering</b>	
Analysis of strong scattering at the micro-scale (CWP-443P) <i>K. van Wijk, D. Komatitsch, J. Scales &amp; J. Tromp</i> . . . . .	203
Constraining relative source locations with the seismic coda (CWP-458) <i>R. Snieder</i> . . . . .	209
Localizing change with Coda Wave Interferometry: Derivation and validation of the sensitivity kernel (CWP-459) <i>C. Pacheco &amp; R. Snieder</i> . . . . .	217
<b>Experimental Studies</b>	
Laser characterization of ultrasonic wave propagation in random media (CWP-439P) <i>J. Scales &amp; A. Malcolm</i> . . . . .	233
Elastic energy propagation in a strongly scattering 1D laboratory model (CWP-440P) <i>K. van Wijk, M. Haney &amp; J. Scales</i> . . . . .	243
Resonant ultrasonic spectroscopy (CWP-438P) <i>B. Zadler, J.H. Le Rousseau, J. Scales &amp; M. Smith</i> . . . . .	249
